Revenue by Month Year and Customer Type

Insight Summary

New customers generated the highest revenue contribution (31.16M), slightly outperforming returning customers (28.52M). This suggests that business growth during the reporting period was driven more by customer acquisition than repeat purchases. Online and retail channels contributed significantly to overall revenue, highlighting the importance of maintaining a balanced sales strategy

Product_Category	Revenue	Total Profit	Quantity Sold	Profit Margin %
Clothing	\$16,360,844.62	(\$1,212,931.51)	6922	▼ -7.41%
Electronics	\$15,153,225.29	(\$843,495.22)	6096	▼ -5.57%
Food	\$12,808,326.23	(\$912,451.37)	5608	▼ -7.12%
Furniture	\$15,363,777.14	(\$1,187,042.26)	6729	▼ -7.73%
Total	\$59,686,173.28	(\$4,155,920.36)	25355	▼ -6.96%

Insight Summary

The Clothing category generated the highest revenue contribution during the reporting period, while overall profitability remained negative due to costs exceeding revenue. Sales volume was concentrated among a few key categories, highlighting opportunities to improve pricing and cost efficiency within underperforming product lines.
